

The Stott and May Group Brand System

A unified visual language across all 3 brands

Brand gradients

Each brand owns a gradient that branches from a shared root. The shared root #00C8C8 is the quiet group signature present in every brand without needing a separate group colour.

Stott and May
#00C8C8 → #73F7BB

Teal to aquamarine. Teal end of the spectrum - completion, delivery, precision recruitment.

Stott and May Consulting
#00C8C8 → #44B3F4

Teal to sky blue. Shares the root with S&M - clearly a sibling - but branches into its own blue completion territory.

Evergreen Talent Partners
#00C8C8 → #7EFF2C

Teal to electric lime. Clean energy, forward motion. The most distinctive branch - lime - is unmistakably ETP.

Shared Group Root
#00C8C8

Unified neutral system

Five stops shared identically across all three brands. These carry no brand signal - they are the foundation that holds the group together and lets the accent colours do the differentiation work.
